```java
package club.westcs.OOPNotes;

public class VikingShipRunner {

    public static void main(String[] args) {

        VikingShip v = new VikingShip();
        VikingShip s = new VikingShip();

        while(v.isFloating() && s.isFloating()) {
            v.attack(s);

            try {
                Thread.sleep(2000);
            } catch (InterruptedException e) {
                e.printStackTrace();
            }
            if(s.isFloating()) {
                s.attack(v);
            }
        }

    }

}
```
