```java
package club.westcs.OldMrYoung;

public class Horse extends Animal{ // extends means that this class inherits
                                   // all protected and public stuff (Attributes, Methods, Constructor)

    //Attributes were inherited

    //Constructor
    public Horse() {
        this.type = "horses";
        this.sound = "niegh";
    }

}
```
